

OLGA

Installation Instructions

Intended audience:	End users and/or IT professionals
Scope:	macOS
Installation time:	2-3 minutes

Step 1 – Download and Install

1. Please make sure you use Safari to install OLGA. If you are using another browser, please copy the link to this document from the address bar and open it in Safari.
2. In the Safari browser, click the following link to download the OLGA:
<https://apps.jastworks.com.au/wyatt/static/OLGA-MAC.zip>
3. Move the downloaded file from the Downloads folder to a folder of your choice. On a MAC computer this could be the Applications or the Desktop folder.

Step 2 – Run OLGA

1. To run OLGA only for the first time, navigate to the folder where you moved OLGA to in Step 1.3, press and hold the Command key and click the OLGA shortcut. In the menu that pops up, select Open.
2. Once you have installed OLGA, the OLGA app should be visible on your screen. Simply click on the app to open OLGA.
